MOMBASSA

coulisse

since 1992

INTRODUCTION

Our Mombassa collection is characterized by its slub yarn and modern look. Its color palette is worked out in soft and natural tones that bring an elegance to the home. Due to the success of the collection and the demand from our customers, we extended the color palette with an essential white color tone that perfectly suits modern as well as more classic interiors.

We extended our bestselling Mombassa collection with a delicate white fabric. Thanks to its unique tactile look, this minimalistic white fabric creates a warm and inviting atmosphere in any space. Like the rest of the fabrics in the collection, the latest addition is also available in black-out as well as transparent.
